

inox 304 + ovale inox

La serie "MP" / "LMP" è realizzata in acciaio inox 304 BA (DIN 1.4301) sp.6/10 - 5/10 senza guarnizione.

Il sistema di giunzione è di tipo maschio/ femmina, mentre il sistema di saldatura è longitudinale continuo alTIG o PLASMA.

Il canale da fumo, come il condotto fumario è idoneo per l'evacuazione dei fumi condensati o secchi per funzionamento in pressione negativa.

Idoneo anche per l'evacuazione dei prodotti di ventilazione. La temperatura max di esercizio per funzionamento in N1 è 600° C senza guarnizione.

Ammessi combustibili solidi con funzionamento a secco.

The "MP" / "LMP" series is made of 304 BA stainless steel (DIN 1.4301) thickness 6/10 – 5/10 without gasket.

The joint system is of male / female type, while the welding system is longitudinal continuous toTIG or PLASMA. The connecting flue pipe, such as the flue liner are suitable for the evacuation of condensed or dried smokes for operations under negative pressure. It is also suitable for the evacuation of ventilation products.

The maximum operating temperature for N1 operations is 600°C without gasket. Solid fuels are allowed for dry running.

La série "MP" / "LMP" est réalisée en acier inoxydable 304 BA (DIN 1.4301) épaisseur 6/10 – 5/10 sans joint.

Le système de jonction est de type mâle / femelle et le système de soudage est longitudinal en continu auTIG ou au PLASMA.

Le canal de fumée et même le conduit sont adaptés pour l'évacuation des condensats ou des fumées sèches pour le fonctionnement en pression négative. Ils sont aussi adaptés pour l'évacuation des produits de ventilation.

La température maximale pour un fonctionnement en N1 est de 600°C sans joint.

Les combustibles solides sont admis pour le fonctionnement à sec.
